**Subject:** 1st cut at language modifications for the Ag findings and RTC documents  
**Attachments:** Draft Final Findings Document102214 (ah).doc; ResponseAHRP10-31.docx

Roberta and I have been discussing options for strengthening the Ag language. She provided me some comments and I took the first shot at making some language modifications. Unfortunately, because of our travel schedules, we have not had a chance to discuss the modifications, nor has Roberta seen them. We will be getting together next week to finalize our suggested changes.

Nonetheless, we wanted to share these with the tech team. Attached are suggested changes to the ag language in the rationale decision document and the RTC document.

The edits to the Draft Final Findings Document appear on the first two pages. We are trying to subtly strengthen the basis for asking for comments on ag and to make it clear that there will be another opportunity to provide comments.

Our edits of the RTC focus on the most common response used in the Draft RTC for ag comments. It brings in language from the 2013 proposed decision.

Again, this is our initial shot. We'll discuss these today.

Let me know if you have any questions.

Alan
